

Airl is essential to our community. They are the only positive radio station on air today. When I am listening to them I never have to worry about vulgar language or obscene remarks. I think this radio station is an essential part of normal broadcasting that it currently being lost.

The effect on the local community if Airl were to be displaced by an LPFM broadcaster providing other programming would be the total loss of an uplifting station that not only provides such an invaluable service but honestly changes lives every day.

I believe that the service provided by Airl is in the public interest because there is no other like it. Because everyday there is more than just a song playing.. there is a message of hope. There is a trust that the community has with this radio station. With all the noise in the world, this station comes in at a whisper. Don't let the only piece of light in this dark world fade! This radio station has truly saved my life. And day by day, it effects a new one !
